**title:** Energy Conservation in Existing Buildings Deskbook  
**author:** Thumann, Albert.  
**publisher:** The Fairmont Press  
**isbn10 | asin:** 0881731382  
**print isbn13:** 9780881731385  
**ebook isbn13:** 9780585120720  
**language:** English  
**subject** Buildings--Energy conservation--Handbooks, manuals, etc.  
**publication date:** 1992  
**lcc:** TJ163.5.B84E5275 1991eb  
**ddc:** 697  
**subject:** Buildings--Energy conservation--Handbooks, manuals, etc.

# Energy Conservation in Existing Buildings Deskbook

Edited by:  
Albert Thumann, P.E., C.E.M.

Published by  
THE FAIRMONT PRESS, INC.  
700 Indian Trail  
Lilburn, GA 30247

Library of Congress Cataloging-in-Publication Data

Thumann, Albert

Energy conservation in existing buildings deskbook / edited by  
Albert Thumann.

p. cm.

Includes index.

ISBN 0-88173-138-2

1. Buildings—Energy conservation—Handbooks, manuals, etc.

I. Thumann, Albert.

## TABLE OF CONTENTS

Preface	xi
Acknowledgements and Disclaimer	xii
I. Introduction	1
II. Energy Management	3
A. The New Discipline: Benefits and Impact	3
B. Why a Professional Program?	
C. The Positive Investment Opportunity	
III. An Overview of Energy Use and Conservation	11
A. Where Energy Is Used in Buildings	12
B. Principles of Energy Use	15
IV. A Phased Methodology	19
A. Introduction	20
B. Phase One: Select the Energy Management Team	20
C. Phase Two: Survey the Building	21
D. Phase Three: Tabulate Present Energy Use	21
E. Phase Four: Identify Energy Conservation Opportunities	21
F. Phase Five: Summarize Costs and Benefits	22
G. Phase Six: Set Goals	22
H. Phase Seven: Implement and Monitor the Program	23
I. Summary	24
V. Surveying the Building	26
A. Introduction	27
B. Step One: Organize a Conservation Journal	27

C. Step Two: Determine Plans for Renovation and/or Expansion Of The Building	27
D. Step Three: Collect and Analyze Building Energy Use Data	28
E. Step Four: Prepare a Graphic Summary of Annual Energy Consumption Patterns	29
VI. Tabulating Present Energy Use	33
A. Introduction	34
B. Energy Conversions	34
C. Heating and Cooling Tabulations	36
D. Total Energy Use Tabulation	37
E. Re-Heat Use Tabulation	39

VII. Analyzing Energy Conservation Opportunities	40
A. Introduction	41
B. Tabulating Future Energy Use	41
C. "ECO's" versus "PECO's".	43
D. Accounting For The "Cumulative Principle".	43
E. Conclusions and Recommendations: The Final Survey Report	44
F. Survey Tools and Examples of the above Procedures	45
VIII. Documents	46
A. Climatic Zone Maps	47
B. Survey and Tabulation Forms	60
C. Charts and Nomographs	75
IX. Energy Conservation Opportunities	163
A. Introduction	165
B. Operational Energy Conservation Opportunities: #1-#7	167
C. Lighting System Energy Conservation Opportunities #8-#15	189
D. Building Envelope Energy Conservation Opportunities #16-#20	219
E. Distribution System Energy Conservation Opportunities #21-#25	238
F. HVAC Equipment Energy Conservation Opportunities #26-#43	262
G. Domestic Water System Energy Conservation Opportunities #44-#46	318
H. Power System Energy Conservation Opportunities #47-#52	328
X. Model Building Energy Study	353
A. Introduction	354
B. Building Data	354
C. Utility Consumption/Cost Survey	357

D. Building and Distribution Load Surveys	358
E. Annual Heating and Cooling Tabulation	360
F. Total Energy Tabulation	362
G. PECO Analysis	363
H. Final Report	394
Bibliography and Selected References	411
Glossary	418
Abbreviations	425
Appendix ATypes of HVAC Systems	427
Appendix BBlank Forms	442
Index	450

## LIST OF FIGURES

Figure Numbers	Page No.
Where Energy is Used in Buildings	
3-1 Comparative Energy Use by System	12
3-2 Energy Used by Identical Office Buildings	13
5-1 Utility Consumption/Cost Survey Form	28
5-2 HB&S Building Utility Consumption Profile	29
5-3 Building Load Survey Form	32
5-4 Distribution Load Survey Form	32
Tabulating Present Energy Use	
6-1 Energy Conversion Units	35
6-2 Climatic Zone Forms	36
6-3 Annual Heating and Cooling Tabulation Form	37
6-4 Electrical Energy Tabulation Form	38
7-1 PECO Energy Tabulation Form	44
8-1 Annual Heating Degree Days (Base 65°)	48-49
8-2 Annual Mean Daily Solar Radiation in Langleys	50-51
8-3 Annual Wet Bulb Degree Hours below 54°F Wet Bulb Temperature and 68°F Dry Bulb	52-53
8-4 Annual Degree Hours Dry Bulb Temperature Greater Than 78°F	54-55
8-5 Annual Degree Hours Wet Bulb Temperature Greater Than 66°F	56-57
8-6 Annual Degree Hours Dry Bulb Greater Than 85°F	58-59

8-7 Climatic Zone Form	61
8-8 Utility Consumption/Cost Survey Form	62
8-9 Building Load Survey Form	63
8-10 Distribution Load Survey Form	67
8-11 Annual Heating and Cooling Tabulation Form	69
8-12 Energy Tabulation Form	72
8-13 PECO Energy Tabulation Form	74
Present and Future Energy Consumption (Windows and Doors)	
8-14 Infiltration through Windows	78-79
8-15 Heating Infiltration through External Doors	80-81
8-16 Cooling Annual Solar Heat Gain through Windows Latitude 25°N-35°N	82-83
8-17 Cooling Annual Solar Heat Gain through Windows Latitude 33°N-45°N	84-85
8-18 Cooling Annual Conduction Heat Gain through Windows	86-87
8-19 Heating Annual Heat Loss through Windows Latitude 25°N-35°N	88-89
8-20 Heating Annual Heat Loss through Windows Latitude 35°N-45°N	90-91
8-21 Heating Annual Heat Loss for Windows With Thermal Barriers	92-93

Present and Future Energy Consumption (Roofs, Walls and Floors)	
8-22 Cooling Annual Solar Heat Gain through Walls Latitude 25°N-35°N	94-95
8-23 Cooling Annual Solar Heat Gain through Walls Latitude 35°N-45°N	96-97
8-24 Cooling Annual Conduction Heat Gain through Walls, Roofs, and Floors	98-99
8-25 Heating Annual Heat Loss through Walls Latitude 25°N-35°N	100-101
8-26 Heating Annual Heat Loss through Walls Latitude 35°N-45°N	102-103
8-27 Cooling Annual Solar Heat Gain through Roof	104-105
8-28 Heating Annual Heat Loss through Roof	106-107
8-29 Heating Annual Heat Loss through Floor	108-109
Present and Future Energy Consumption (Humidity and Outdoor Air)	
8-30 Cooling Annual Energy Used per 1000 CFM to Maintain Various Humidity Conditions	110-111
8-31 Heating Annual Energy Used per 1000 CFM Outdoor Air	112-113
8-32 Heating Annual Energy Used per 1000 CFM to Maintain Various Humidity Conditions	114-115
Future Energy Consumption (Heating Controls and Equipment)	
8-33 Heating Energy Saved by Night Setback	116-117
8-34 Heating Effect of Flue Gas Composition and Temperature on Boiler Efficiency	118-119
Future Energy Consumption (Lighting)	
8-35 Lighting Resultant Footcandles and Watts/Sq Ft For	120-121

## Various Lamp Changes

8-36 Lighting	Fixture Cleaning Cycle	122-123
8-37 Lighting	Lamp Lumen Depreciation of Standard Lamps	124-125
8-38 Lighting	Example of Maintenance Factor Effect of Footcandles	126-127
8-39 Lighting	Fluorescent Group Relamping	128-129
8-40 Lighting	Efficacy of Different Lamp Type and Wattage	130-131
Future Energy Consumption (Roofs, Walls and Floors)		
8-41 Heating	Effect of Insulation on "U" Value	132-133
Future Energy Consumption (Fans and Pumps)		
8-42 Ventilation	Annual Energy ConsumedCentrifugal FansForward Curve Blades	134-135
8-43 Ventilation	Annual Energy ConsumedCentrifugal FansBackward Curve Blades	136-137

8-44 Pumps Annual Energy Consumed Centrifugal Pumps Up to 138-139  
500 Gallons per Minute

8-45 Pumps Annual Energy Consumed Centrifugal Pumps Up to 140-141  
2000 Gallons per Minute

#### Future Energy Consumption (Ducts and Pipes)

8-46 Duct Insulation Heat Loss/Gain for Various Thickness 142-143

8-47 Heating Heat Loss For Various Pipe Sizes, Insulation 144-145  
Thickness, and Water Temperatures

8-48 Heating Heat Loss For Various Pipe Sizes, Insulation 146-147  
Thickness, and Water Temperatures

8-49 Cooling Heat Gain For Various Pipe Sizes and Insulation 148-149  
Thickness 45° Water

8-50 Steam Traps Steam Loss Through Leaking Steam Traps 150-151

#### Future Energy Consumption (Cooling Equipment)

8-51 Cooling Effect of Condenser Temperature on Chiller 152-153  
Coefficient of Performance COP

8-52 Cooling Effect of Chilled Water Temperature on Chiller 154-155  
Coefficient of Performance COP

#### Future Energy Consumption (Heat Reclaim)

8-53 Lighting Effect of Heat Transfer on Light Outputs 156-157  
Electrical Usage

8-54 Lighting Thermal Performance of "Wet" Heat of Light 158-159  
Fixture

#### Future Energy Consumption (Power System)

8-55 Motors Efficiency and Power Factor 160-161

#### Auxiliary Figures

8-56 Yearly Heat Loss/Gains thru Single/Double Glazing 162

#### Operational Energy Conservation Opportunities

9-1 Guidelines for Some IAQ Pollutants	174
9-2 Suggested Indoor Temperatures and Humidity Levels in the Heating and Cooling Season	176
9-3 Energy Saving from Increased Summer Space Temperature	180
9-4 Isolating Off-Line Boilers	184

Lighting System Energy Conservation Opportunities	
9-5 Recommended Lighting Levels	194
9-6 Relamping Changes to Increase Lighting Efficiency Without Modifications to Luminaires	209
Building Envelope Energy Conservation Opportunities	
9-7 Shading Coefficients	227
Distribution System Energy Conservation Opportunities	
9-8 Air Resistance through Coils	242
9-9 Air Resistance through Branch Ducts	243
9-10 Air Filter Type Comparison	244
9-11 Pump System Curve	252
9-12 Pump System Curve	253
9-13 Water Resistance through Long Runs	254
9-14 Steam Trap Waste	261
HVAC Equipment Energy Conservation Opportunities	
9-15 Outside Air Dampers	266
9-16 Carbon Filter Application	270
9-17 Exhaust Hood Make-Up Air	272
9-18 Desiccant Dehumidification	276
9-19 Heating System Time/Load Curve	282
9-20 Effects of Boiler Cycling	286
9-21 Seasonal Heat Load Distribution	287
9-22 Efficiency Increase with Pre-Heated Air	289
9-23 Effect Of Bypass through Off-Line Chillers	298
9-24 Applications of Heat Reclamation Devices	305

9-25 Waste Heat Recovery from Central Chiller	308
9-26 Thermal Wheel Sections	309
9-27 Run around Heat Recovery System with Multiple Coils	310
9-28 Heat Pipe Exchanger	311
9-29 Flue Gas Heat Exchanger	312
Domestic Water System Energy Conservation Opportunities	
9-30 Ratios of Insulation Thickness and Tank Size to Hourly Heat Loss	321
9-31 Hot Gas Heat Exchanger	322
9-32 Hot Condensate Heat Exchanger	323
9-33 Hot Drain Heat Exchanger	324

Power System Energy Conservation Opportunities	
9-34 Power Factor Correction	337
9-35 Partial Listing of Suggested Maximum Capacitor Rating When Motor and Capacitor Are Switched As a Unit	341
9-36 Central Control System	343
9-37 Table of Interface Points	344
9-38 Interface between Programs	350
Model Building Data	
10-1 HB&S Building First Floor Plan	356
10-2 HB&S Building Second Floor Plan	356
Utility Consumption\Cost Survey	
10-3 Example of Completed Utility Consumption/Cost Survey Form	357
10-4 Example of Completed Utility Consumption Profile	357
Building and Distribution Load Surveys	
10-5 Example of Completed Building Load Survey Form (Drug Store)	358
10-6 Example of Completed Building Load Survey Form (Office)	358
10-7 Example of Completed Building Load Survey Form (Misc.)	359
10-8 Example of Completed Distribution Load Survey Form	359
Annual Heating and Cooling Tabulation	
10-9 Example of Completed Climatic Zone Form	360
10-10 Example of Completed Annual Heating and Cooling Tabulation Form for The Drug Store Spaces	361
10-11 Example of Completed Annual Heating and Cooling Tabulation Form for The Office Area	361

10-12 Example of Completed Annual Heating and Cooling Tabulation Form for Systems Effecting the Entire Building	362
Total Energy Tabulation	
10-13 Example of Completed Energy Tabulation Form for Electricity	362
10-14 Example of Completed Demand Energy Tabulation Form for Electricity	363
10-15 Example of Completed Energy Tabulation Form For Gas PECO #1	363
10-16 Drug Store Building Load Survey Form	365
10-17 Drug Store Annual Heating and Cooling Tabulation Form	366

10-18 Office Building Load Survey Form	366
10-19 Office Heating and Cooling Tabulation Form	367
10-20 Building Distribution Load Survey Form	367
10-21 Building Annual Heating and Cooling Tabulation Form	368
10-22 Electrical Energy Tabulation Form	368
10-23 Gas Energy Tabulation Form	369
10-24 Energy Tabulation Form	369
PECO #2	
10-25 Drug Store Building Load Survey Form	371
10-26 Office Building Load Survey Form	372
10-27 Drug Store Annual Heating and Cooling Tabulation Form	372
10-28 Office Heating and Cooling Tabulation Form	373
10-29 Electrical Energy Tabulation Form	373
10-30 Electrical Energy Demand Tabulation Form	374
10-31 Energy Tabulation Form	374
PECO #3	
10-32 Drug Store Building Load Survey Form	375
10-33 Office Building Load Survey Form	376
10-34 Drug Store Annual Heating and Cooling Tabulation Form	376
10-35 Office Heating and Cooling Tabulation Form	377
10-36 Electrical Energy Tabulation Form	377
10-37 Gas Energy Tabulation Form	378
10-38 Energy Tabulation Form	378
PECO #4	
10-39 Drug Store Building Load Survey Form	380

10-40 Office Building Load Survey Form	380
10-41 Drug Store Annual Heating and Cooling Tabulation Form	381
10-42 Office Heating and Cooling Tabulation Form	381
10-43 Electrical Energy Tabulation Form	382
10-44 Electrical Energy Demand Tabulation Form	382
10-45 Energy Tabulation Form	383
PECO #5	
10-46 Example of Completed Energy Tabulation Form For Electricity	384
10-47 Example of Completed Energy Tabulation Form For Gas	385
10-48 Energy Tabulation Form	385
